Alpine CD Interface Application Guide

Alpine CD Interface Application Guide

Applicable Alpine Changers

Any of the Alpine M-Bus changers will work in conjunction with the ICD interface. However, we recommend that you use the Alpine **CHM-S630**.

An Alternative changer is the CHA-S634; this will need to be used in conjunction with the Alpine KCA-130B M-Bus conversion lead (**This conversion may impair functionality**).

Applicable Vehicle Details	Comments / Additional Information	Interface Part Number
